#### Application field:

all-year forestry work

The jacket was worn for a total of 379 work days at all test stations.

	Test item	Overall evaluation
<b>Jacket</b>	Comfort	+
	Durability	+++
	Features	+O
	Care	+++
<b>Overall rating</b>		<b>good</b>

+ + = excellent; + = good; o = satisfactory; - = acceptable; - - = inadequate

## INDIVIDUAL OPINIONS FROM THE PRODUCT TEST:

Softshell	Comments (+)	Comments (-)
<b>Comfort</b>	The jacket was described as comfortably light, a good and warm jacket when worn under the work jacket at temperatures below 5°C. Weight, feel against the skin and comfort in cold conditions received the best ratings in this test.	The jacket is a little too small for the size, especially at the arms. This limits freedom of movement. The breathability of the jacket is too low for a work jacket and causes those wearing it to sweat quickly.
<b>Durability</b>	No damage noted during the test period.	
<b>Features</b>		The pockets were criticized as too small and too few in number. Test persons also criticized the lack of ventilation slits.
<b>Care</b>	The form and colour stability of this softshell jacket proved to be good. It is an easy to clean jacket.	Resin stains are impossible to remove, also due to the low washing temperature.

The fleece-shirt "Polar" has a very slim fit. It is suitable at cold weather and as a warm underwear, at higher temperatures or harder physical activities it is quite warm.
